

Allocation table for the infection control fund for adult social care

Source data

- CQC Care Directory with Filters, May 2020¹. The small number of care home beds assigned to Flintshire or Unspecified are excluded from the calculation.
- MHCLG Area Cost Adjustment². Bournemouth, Christchurch and Poole council and Dorset council (both created in April 2019) have been assigned an ACA of 1 as their predecessor councils of Bournemouth, Poole, and Dorset County Council all had an ACA of 1.

Method

- The allocation shares for each council are calculated as [Number of care home beds * Area Cost Adjustment] / England sum of [Number of care home beds * Area Cost Adjustment]. The Area Cost Adjustment reflects differences in wages and prices in different councils.

Note

- An amount per care home bed is shown for each council. It is expected that each care home should receive an amount per CQC registered bed (see footnote for data)³ as set out in the table. The amounts per bed represent 75% of the funding. As explained above, the remaining 25% must be used for infection control measures, however local authorities are able to allocate based on need. This may involve support for domiciliary care workforce measures.
