

A sustainable solution for care homes

A winning combination of high-performance hygiene, reduced carbon footprint, and cost savings.

Use less and achieve more with typical operational cost savings of 20%.

We help care homes to realise significant savings by making strategic swaps to products and systems that will simply do the job better; saving them time, effort, energy consumption and waste.

Our offering goes a lot further than just supplying products and services. Focused on value, we make it possible for care homes to

- ✓ Use fewer, but more effective consumable products
- ✓ Get better cleaning results – first time
- ✓ Improve performance
- ✓ Maximise infection control
- ✓ Create less waste
- ✓ Save valuable time
- ✓ Reduce environmental impact
- ✓ Cut operating spend
- ✓ Focus on providing excellent levels of care.

We're here to make a difference to lives, making work-life easier and more rewarding for people working in a care home, to make care home life better for those who live there.
